

# Harrington, Inc.

*"A family of services for your business or family's needs."*

HARRINGTON ELECTRICAL CONTRACTORS

## *Estimate*

All work will be performed and installed to meet all state and local codes. In the event of codes not being met through the design on the plans, and adjustments must be made, a change order must be developed and signed by the contractor.

A final set of plans must be developed and signed off on by Alexander County Inspections Dept., the General Contractor, and Electrical Contractor before work will begin. All fixtures and devices will have to be reviewed before anything is ordered.

Estimated cost for this project as described above and by Paged E 1-10 is:  
**Three Hundred Sixteen Thousand, Five Hundred Dollars. (\$316,500.00)**

### ***COST SAVING RECOMMENDATIONS:***

*In our opinion there could be a large cost savings by changing some of the lighting and not using the Lutron Dimming system. We would recommend using LED Panel lights and possibly Regular Recessed cans with LED Trims. Also, the dimming in the sanctuary can be accomplished with less expensive dimming devices.*

*In our opinion these or some of these could save as much as:*

*Forty to as much as Fifty Five Thousand, Dollars. (- \$40,000.00 – \$55,000.00)*

*Making the Estimate:*

*\$276,500 - \$261,000*

*This estimate is presented to you in good faith and we appreciate the opportunity to do so. We at HEC only ask that you please pay special attention to the details of each estimate you receive for this Important project, to make sure they are all equal in material, workmanship, and service after the sale. We pride ourselves in being there for our customers when they need us.*

***WE WILL BE THERE FOR YOU!***

*Respectfully Submitted,*

*Rick Harrington*
